Payment of Freight Charges

25X1A

25X1A
25X1A

1. Authority is requested to pay freight charges on personal effects of [REDACTED] GS-11, from Washington, D. C. to Bunnell, Florida, his legal residence. The cost is approximately \$68.00 on net to exceed 2,000 lbs. of freight which the subject brought back from [REDACTED] when transferred to Washington, D. C., PCS.

2. [REDACTED] would not normally be entitled to reimbursement for these charges; however, there are extenuating circumstances involved in his employment. Subject went overseas as an enlisted man in 1943 and except for two weeks' emergency leave remained abroad until February, 1951. During that time he became a Department of the Army civilian employee and as such would have been authorized to ship his personal effects to his legal residence upon termination of employment. However, he was subsequently transferred in the field to the rolls of OSO. Although at that time he was assured that he would be able to ship this modest amount of personal effects to his legal residence at government expense, it is now found that transfer to CIA and PCS to Washington under new regulations prevents the fulfillment of the Government's obligation.

3. Since the subject has no use for these effects under his current living conditions in Washington, approval of this request will save the Agency the three months' storage at Government expense to which the subject is entitled.
